<u>**Vimal Chamyal**</u>

Front-end developer | React developer | Web developer

Location: Vadodara, Gujarat

Mob. 8320115488 | Email : vlms1869@gmail.com

Summary:

As an individual, I am a **detail-oriented, team player,** and a **proactive problem solver** who has **strong communication** and interpersonal skills. I have **a proven aptitude to understand and ace in new and so termed difficult subjects**, technologies and skills very quickly. And now, **all I want is an opportunity, a chance** to join a team **wherein I could learn immensely** by applying my learnings in the real world scenario.

Education:

Uttarakhand Technical University, Dehradun, UK   **2020**

B.Tech in Mechanical Engineering

Gujarat Refinery School, Vadodara, GJ - Affiliated to Gujarat Board

Class 12   **2014**

Subjects: **Computer science**, English, Physics, Chemistry, Mathematics

Class 10   **2012**

Subjects: **Computer science** and other common subjects

Technical Skills:

Basic computing	- Touch typing (65 - 70 WPM), MS office, G-suite, Outlook etc.
Operating Systems	- Windows, Linux, Chrome
Source control/Version control	- **Git**, **Github**
Programming languages	- **HTML, CSS**, **Javascript**
Frameworks/libraries	- **React, Tailwind CSS, Firebase Node, Express**
UI/UX framework	- **Material UI, Ant design**
Data Analysis/BI tools	- Advance Excel, Tableau (basics-intermediate)
Database systems	- **MySQL, MongoDb**
Orchestrations tools (basic theory)	- **Dockers**

Projects:

The Amazon website clone - React, Material UI, Context API, Stripe, Firebase   **- In progress**

- I've just started with this project which is a fully functional **clone of the E-commerce website** - Amazon.
- The clone is exactly a replica of the Amazon website and it covers every functionality that a leading E commerce website can have right from user **registration/authentication**, **add to cart** functionality and the **payment** functionality.
- After I complete this project, I will be heading to make a **clone of instagram**

Restaurant landing page - React, Javascript, HTML, CSS   **- Completed**

- I have made a fully responsive restaurant landing page
- For making the webpage I've used React which is a front end Javascript library

My portfolio (basic) - HTML, CSS, Canva   **- Completed**

- I have made my portfolio website that displays my projects, abilities and strong interest in web development.
- Because I don't have many projects deployed at present and I haven't added the about section yet, that's why it doesn't look awesome as of now but I'll keep on making more projects and will update it in nearly every 2-3 days.
- I got a random design from the HTMLup website, modified it as per my need, added my details, pictures etc… and got it ready.
- I also used **Canva** (free version) to make a welcome picture that I've used in my portfolio and also in the blurry loading image project

Workout music player - Javascript, HTML, CSS   **- Completed**

- It's **a music app** which has 3 preloaded workout songs.
- The app is with **play and pause functionality.**
- User can also **switch songs and a progress bar** is also visible when the song is being played

Blurry loading image - Javascript, HTML, Canva   **- Completed**

- I made a welcome picture with the help of Canva and I've used the same picture in my portfolio as well.
- Then I used the picture in this project which displays the picture with a blurry loading effect.
- I've **deployed the project using Github pages** and **I've added it in my portfolio** for your kind reference.

Basic counter app - Javascript, HTML   **- Completed**

- A full fledged **counter app.**
- The app is able to increment the count by initialising the count from 0 and can store the count for later reference.

Professional experience:
